**fibershed**  
lead from lead by lead here

Fibershed's mission is to develop, support and promote local natural fiber systems.

- We establish relationships & build networks of farmers and makers
- Our work includes: Public Education & Skills Training.
- We design, organize and develop fiber systems.

Unintended Consequence of Synthetic Fibers:

\*1,900 microfibers: polyester, acrylic, and nylon released with each washing of a synthetic garment; most prevalent microplastic found on our planet's beaches and shores

\*Microfibers are the first to get into the food web

\*Journal of Environmental Science and Technology
